politic-academic(s)

... the fact that science(s) are cultivated in academic surroundings constitutes a danger in that the attitude(s) adequate to the understanding of an actual sector of human experience are suppressed in the contemplative atmosphere which prevails in academic institutions ...   ideology & utopia

politic-answer(s)

what direction(s) should we take ... ?

... the answers are not easy, but one thing we know for certain: **we can only get the right answer(s) by asking the right question(s)** ...

                                        REBEL CITIES / ...

politic-common(s)

knowledge ... is a cooperative process of group life, in which everyone unfolds his/her knowledge within the framework(s) of a common fate, a common activity, and the overcoming of common difficulties ... (in which each, however, has a different share)   ideology & utopia

politic-conduct(s)

politic conduct is confronted with a process in which every moment creates a unique situation and seeks to disentangle out of this ever-flowing stream of forces something of enduring character.

... the question then is: **is there a science of this becoming, a science of creative activity**?

                                        ideology & utopia

politic-consumer(s)

... financiers and upper class consumer, bereft of any social imagination

those who create an interesting and stimulating everyday neighborhood life lose it to the predatory practices of the real estate entrepreneurs, ...   REBEL CITIES

politic-discussion(s)

... in the 1960's the art colleges were hotbeds of radical discussion but their subsequent pacification and professionalization has seriously diminished agitational politics!   REBEL CITIES

politic-economy(s)

a political economy of mass dispossession, of predatory practices to the point of daylight robbery – particularly of the poor and the vulnerable, the unsophisticated and the legally unprotected – has become the order of the day ...   REBEL CITIES

politic-engineering(s)

dream(s) / utopia(s) / transform(s) / adventure(s) / ethic(s)

the purely technical requirements of engineering can no longer be taught in workshops ... it is quite possible, however, where we deal with creative impulses whose form is still in process of growth, to apply those more living forms of collaborative educational associations which are designed to *awaken* interest and transmit insight ...
<div align="right">ideology & utopia</div>

politic-ethic(s)

dream(s) / utopia / transform(s) / adventure(s) / moral(s)

- **ethic(s) of fatalism** – submission to inscrutable power(s)

- **ethic(s) of conscience** – (individual) self against destiny

- **ethic(s) of responsibility** – consequence(s) of action(s)

- **ethic(s) of transparency** – (critical) self-examination(s)

<div align="right">ideology & utopia / trivium / ethic(s)</div>

politic-find(s)

dream(s) / utopia(s) / transform(s) / adventure(s) / ethic(s)

... does anyone believe it is possible to find an honest capitalist, an honest banker, an honest politician, an honest shopkeeper or an honest police commissioner anymore?

Yes, they do exist! But only as a minority that everyone else regards as stupid.
